### WHAT WE DO

Flawless Steel Welding is a turnkey minority-owned, and AISC certified company specializing in steel fabrication and erection.

With top-of-the-line technology such as Tekla Power Fab, we can generate 3D pre-construction models to cover every aspect of the project, obtain accurate takeoffs, and offer competitive pricing.

This technology gives us an advantage against our competitors as we are already at least two weeks ahead on the detailing process once a project is awarded.
